## 公司简介 Company profile

西安世嘉电机有限公司（简称：世嘉电机）是一家专业从事直流微特电机及控制器研发、生产和销售为一体的高科技企业。公司拥有数名经验丰富的工程技术人员和高级工程师，长期以来与西北工业大学、西安交通大学、陕西科技大学等高校进行产、学、研一体化合作、交流，使大量行业新技术得以推广、应用。

Xi 'an SHJ Motor Co., LTD. (referred to as: SHJ Motor) is a high-tech enterprise specialized in the development, production and sales of DC micro motors and controllers. We have several experienced engineering and technical personnel and senior engineers, for a long time cooperating with Northwestern Polytechnical University, Xi 'an Jiaotong University, Shaanxi University of Science and Technology and other colleges and universities to carry out integration cooperation and exchanges, so that a large number of new technologies in the industry can be promoted and applied.

## 公司简介 Company profile

经过多年的深耕，形成四大系列产品：GJB系列、深水系列、高温系列、耐辐照系列。产品类型主要有永磁直流有刷电机、永磁直流无刷电机、交/直流伺服电机以及电机控制器。产品具有体积小功率密度大，可靠性高，环境适应能力强等优势，广泛应用于航空、航天、武器、能源勘探、水下设备、核工业等领域；同时由于体积小运行平稳，在精密医疗器械以及其它机电一体化运动控制类产品中得到广泛应用。

公司秉承“品质为客户创造大价值”的理念，凭借雄厚的研发实力、专业有素的团队、完善的服务、严格的内部管理、以及永无止境的创新精神迎接市场挑战，向用户提供一流产品。

After years of working, we have the following four series of products: GJB series, deep water series, high temperature series, radiation resistance series. The main product types are permanent magnet DC brushless motor, permanent magnet DC brushless motor, AC/DC servo motor and motor controller. Our products have the advantages of small volume, high power density, high reliability, strong environmental adaptability, etc., and are widely used in aviation, aerospace, weapons, energy exploration, underwater equipment, nuclear industry and other fields. At the same time, due to its small size and smooth operation, it is widely used in precision medical devices and other mechatronics motion control products.

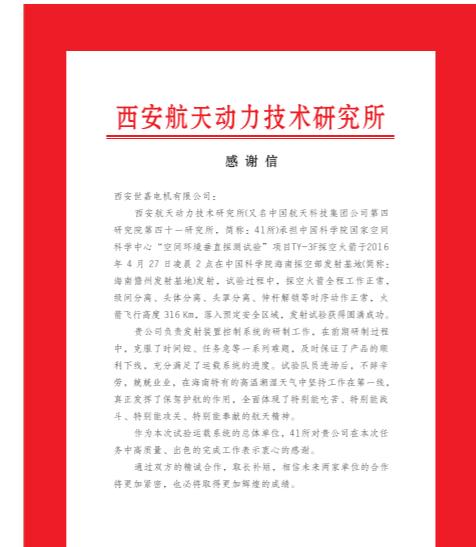

We have been adhering to the "quality to create great value for customers" concept, with strong R & D strength, professional team, perfect service, strict internal management, as well as the never-ending spirit of innovation to meet the market challenges, to provide users with first-class products.

## 公司资质 Company certification

高新技术企业

西安航天动力技术研究所  
感谢信

## 公司资质 Company certification

防爆合格证

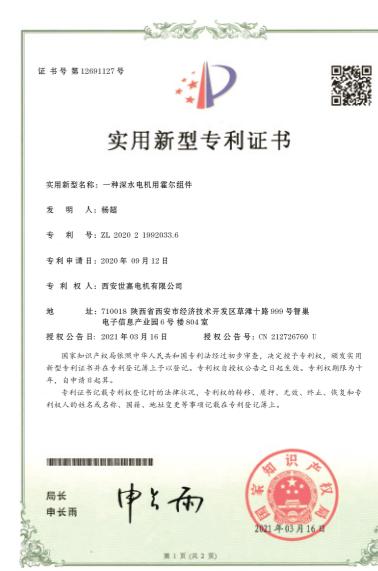

## 公司专利 Company patent

- ◆ 一种海水电机用全不锈钢转子专利证书  
Patent certificate of all stainless steel rotor for seawater motor
- ◆ 一种旋转变压器定子微调工具专利证书  
Patent certificate of a rotating transformer stator fine-tuning tool
- ◆ 一种高低温电机轴承室用间隙补偿衬套专利证书  
Patent certificate for gap compensation bushing for bearing chamber of high and low temperature motor
- ◆ 一种伺服电机轴端防水用磁性连接装置专利证书  
The invention relates to a magnetic connection device for waterproofing the shaft end of a servo motor

## 公司专利 Company patent

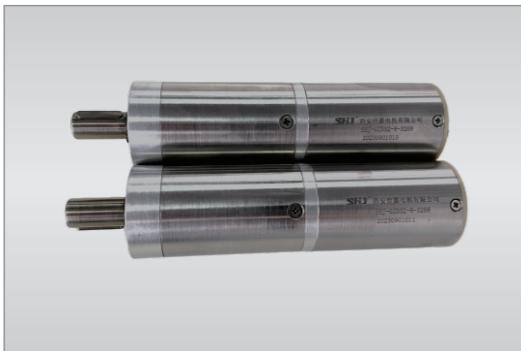

- ◆ 一种开放式深水电机专利证书  
Patent certificate of an open deep-water motor
- ◆ 一种深水电机电缆防水结构专利证书  
Patent certificate of a deep water motor cable waterproof structure
- ◆ 一种深水电机用霍尔组件专利证书  
Patent certificate of Hall assembly for deep-water motor
- ◆ 隔爆型直流伺服电机专利证书  
Flameproof DC servo motor patent certificate

# GJB系列 GJB Series

**SHJ**

世嘉GJB系列电机以GJB 9001C-2017质量体系标准为准绳，严把电机和相关产品质量关，在精湛的工艺水平以及独特的设计思路和新型材料率先引入应用的加持下，每一款产品在与之对应的工况以及环境下都能保持高可靠性和高稳定性运行。

SHJ GJB series motor with GJB 9001C-2017 quality system standard as the criterion, strictly control the quality of motor and related products, in the superb technology level and unique design ideas and new materials first introduced application with the support of each product in its corresponding working conditions and environment can maintain high reliability and high stability operation.

世嘉电机采用高效的强磁稀土材料以保证高功率密度的同时采用H级绝缘材料保证电机绕组的最高温度可达到180℃，过载能力可达到额定的3倍。效率可达到90%以上。

SHJ Motors use highly efficient high-magnetic rare earth materials to ensure high power density, while using Class H insulation materials to ensure that the maximum temperature of the motor winding can reach 180 ° C, overload capacity can reach 3 times the rated. The efficiency can be more than 90%.

低温满足GJB150.4，高温满足GJB150.3，振动满足GJB150.16，冲击满足GJB150.18，工作湿度满足GJB150.9，电磁兼容可做到符合GJB 151，使用环境温度范围最高可扩展至-75℃~105℃。

The low temperature fulfill GJB150.4 Standard, the high temperature fulfill GJB150.3, the vibration meets GJB150.16, the impact fulfill GJB150.18, the working humidity fulfill GJB150.9, the electromagnetic compatibility can fulfill GJB 151, and the ambient temperature range can be extended to the maximum of -75°C ~105°C.

世嘉GJB电机在精密转台，车载设备，舰船设备，火炮随动，车载雷达，发射装置，舰炮随动设备，舰载雷达，送弹设备，挂弹装备，光电吊舱等特种设备上，有着广泛的应用案例。

SHJ GJB motor has a wide range of application cases in precision turntable, vehicle equipment, ship equipment, gun servo, vehicle radar, launcher, naval gun servo equipment, shipboard radar, bomb delivery equipment, bomb hanging equipment, photoelectric pod and other special equipment.

# 深水系列 Deep Water Series

**SHJ**

世嘉深水电机系列，特有的专利磁耦合密封技术以及内外压力自平衡技术使之能轻松应对深度6000米的各种介质中，可承受高达60MPa的压力。

SHJ Deep Water motor series, with unique patented magnetic coupling sealing technology and internal and external pressure self-balancing technology make it easy to handle a variety of media depths of 6,000 meters, can withstand pressure up to 60MPa.

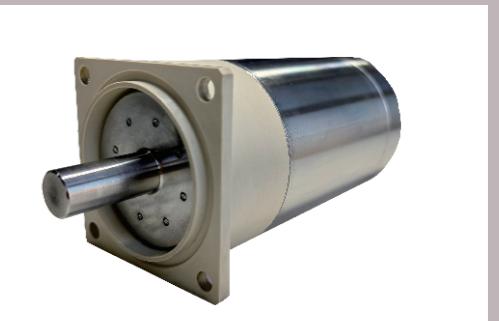

特种新型高强度耐腐蚀型新材料的引进并且使用，使之能轻松应对海水，淡水，污水，弱碱，弱酸等介质。

The introduction and application of special new high-strength corrosion-resistant new materials make it easy to cope with seawater, fresh water, sewage, weak alkali, weak acid and other media.

具有专利保护的磁耦合密封技术以轻松应对轴端动态密封的难题，使电机在全生命周期内保持零渗漏。

The patented magnetic coupling sealing technology easily addresses the challenge of dynamic sealing at the shaft end, allowing the motor to maintain zero leakage within its life cycle.

特种新型材料的使用，使电机铁损发热量降至最低，延长电机寿命的同时以保证电机可靠性。

The application of special new materials reduces the heat loss of the motor to the minimum, extend the life of the motor and guarantee the reliability of the motor.
